

Figure1: Block diagram of structure of farmbook

Farmbook solves problems faced by farmers across the globe. By providing a social network Farmbook connects the farmers and provides a platform for those farmers seeking help. Forum contained in Farmbook is a place for open discussions on specific problems faced by farmers. The E-Commerce section can be used to buy/sell organic products

FarmBook can evolve further by the introduction of GPS tracking which can track a person's location thus eliminating the need of adding the aforementioned location manually. It can also be further expanded with the development of an iOS app.
